# MINH CHAU

My career goal is to apply my skills and knowledge in producing quality and meaningful projects through data solutions that benefit critical decision making. I currently seek a suitable job to enhance my statistical and programming skills, practice new packages and contribute to New Zealand society.

## EDUCATION

03/2019 | 06/2020
**Master of Applied Statistics**
Victoria University of Wellington — Wellington, NZ

03/2015 | 06/2019
**Bachelor of Science in Statistics**
Otago University — Dunedin, NZ

## WORK EXPERIENCE

08/2020 | 09/2020
**Research Assistant**
Massey University Wellington — Wellington, NZ
- Create informative graphs and interpret results
- Extract, process and analyze survey data using appropriate statistical methods
- Communicate with client clearly to fulfil requirements

04/2020 | current
**Sessional Assistant**
Victoria University of Wellington — Wellington, NZ
- Mark 100-level statistics assignments
- Attend to training and meetings
- Enter assignments' grades correctly and in accordance with the marking system's guidelines

03/2020 | 06/2020
**Intern/Data Analyst**
Harmonic Analytics — Wellington, NZ
- Wrangle and analyze time series data
- Investigate different predictive modelling methods
- Produce a dashboard with interactive plots to present the results
- Co-operate with supervisors to deliver according to the client's requirements

08/2018 | 12/2019
**Sandwich Artist**
Subway — Wellington, NZ
- Work in a busy team under pressure
- Prepare orders neatly, according to formula, and in a timely manner
- Adhere to proper food handling, safety and sanitation standards

## CONTACT

minh.chau@outlook.co.nz

Linkedin

## PACKAGES

**Statistical Programming:** R, SAS, SPSS, SQL
**Web development:** Shiny, HTML, CSS
**Reporting:** R Markdown, Latex
**Workflow:** Github, Gitlab
**MS Office:** Word, Excel, Power Point

## KEY SKILLS

- Experience with documenting data processes and generating statistical reports
- Ability to disseminate raw data and information and communicate in numbers
- Advanced data analytics and data visualisation skills
- Critical thinker, team player and problem-solver
- Knowledge of complex statistical modelling and methods

## LANGUAGES

- Vietnamese (native)
- English (fluent)

## PROJECTS

The following projects can be found in details on my personal website, **https://minhchauvannguyen.github.io/**.

08/2019

**Statistical Consulting Assignment**
Report written based on the *Factors influencing the total mercury and methyl mercury in the hair of the fishermen* article by *N.B. Al-Majed* and *M.R. Preston*, with the aim to investigate the relationship between the amount of fish intake and mercury levels found in fisherman hair.
**Link**

09/2019

**Kaggle Data Shiny Application**
Shiny application interactive analysis of Kaggle suicide statistics accumulated at world level. I built this application when I first learned how to use Shiny for a university project assignment.
**Link**

02/2020

**Cluster Analysis Research Project**
Research study documenting the cluster analysis of ordinal and binary lingustics data. The model-based clustering approach using finite mixtures was proposed and the general ordinal models were described in the context of one-mode and two-mode hard clustering.
**Link**

05/2020

**Time Series Analysis of Orange data Technical Report**
Technical report summarising a variety of methods used for fitting time series data. The aim is to keep track of the data process, and report the findings of the models' perfomances and their predictive ability.
**Link**

06/2020

**Time Series Analysis Shiny Dashboard for Orange data**
Shiny dashboard demonstrating Time Series analysis of randomly generated data. This dashboard was reproduced using the structure of the dashboard I had previously created for a client during my internship at Harmonic Analytics.
**Link**

07/2020

**ICMR in patients under 18 years old design study**
In applying multinomial logistic regression and Kaplan-Meier survival methods to health data, the purpose of this study is to examine the long term effect of Carpentier-Edwards Ring or Band annuloplasty in patients under the age of 18 years old.
**Link**

09/2020

**ICMR in patients under 18 years old follow-up report**
This research study explores three different statistical methodologies, contingency table analysis, Bayesian approach to multiple multinomial logistic regression and Random Forest classification algorithm and their application to health data. The results were reported to conclude the relationship between the side effect of annuloplasty Band and the clinical outcome of Mitral Regurgitation in patients with mitral valve diseases.

## REFERENCE

- **Shirley Wu**
  Operation Manager
  Harmonic Analytics
  **shirley@harmonic.co.nz**
- **Ploi Yibmantasiri**
  Data Scientist
  Harmonic Analytics
  **ploi@harmonic.co.nz**
- **Ge Guo**
  Subway Owner
  **subway_cablecar@hotmail.com**

This resume was made with the R package **pagedown**.
