

MINH CHAU

I am a persistent and accountable graduate with more than two years experience using statistical analysis and reporting software. I am seeking employment that will enhance my profession as a Data Analyst in producing reliable statistics, and thus contribute to New Zealand society.

|
06/2019

Master of Applied Statistics

Victoria University of Wellington

Wellington, NZ

Bachelor of Science in Statistics

Otago University

Dunedin, NZ

WORK EXPERIENCE

08/2020
|
current

Research Assistant

Massey University Wellington

Wellington, NZ

- Communicate with the client clearly to fulfil requirements
- Prepare and transform survey data for analysis purposes
- Create informative graphs and tables to present key findings
- Apply statistical methods to data to produce insightful interpretations that assist the client in making decisions

04/2020
|
current

Sessional Assistant

Victoria University of Wellington

Wellington, NZ

- Mark 100-level statistics assignments and projects
- Attend to training and meetings
- Enter assignment grades correctly and in accordance with the marking system's guidelines

03/2020
|
06/2020

Intern/Data Analyst

Harmonic Analytics

Wellington, NZ

- Extract, wrangle and analyse time series data to draw appropriate interpretations and conclusions
- Construct time series models to make monthly and yearly predictions
- Produce an interactive Shiny dashboard to present predictive techniques and significant statistical results
- Co-operate with supervisor and manager to deliver according to the client's requirements and ensure data quality is optimised

PACKAGES

Statistical Programming:

- ☐ Experience with R
- ☐ Exposure to SAS, SPSS, SQL

Web development: HTML, CSS

Machine learning: Python (Entry level)

Reporting: R Markdown, Shiny, LaTeX

Workflow: Github, Gitlab

MS Office: Excel, Power Point, Word

STRENGTHS

Experience with data wrangling and statistical analysing

Build and maintain professional work relationships

Fluent ability to create evidence-based reports

Good understanding of survey design and analysis

Ability to collaborate and work independently

Strong data presentation and data visualisation skills

PROJECTS

The following projects which can be found in details on my portfolio, <https://minhchauvannguyen.github.io/>, have helped me to develop and strengthen my analytical, programming and reporting outcomes abilities.

08/2019

Statistical Consulting Assignment

[Link](#)

Objective : Investigate the relationship between the amount of fish intake and mercury levels found in fisherman hair.

Key skills learned

- Apply explanatory analysis and descriptive statistics to identify trends and patterns in the given data
- Report statistical methodologies and data processes using technical documenting tools

02/2020

Cluster Analysis Research Project

[Link](#)

Objective : Outline the research methods necessary for the analysis of ordinal and binary linguistics data.

Key skill learned

- Apply research statistical methods to ordinal data and produce research-oriented report based on theoretical constructs and literature review

06/2020

Time Series Analysis Shiny Dashboard

[Link](#)

Objective : Demonstrate time series analysis and predictive modelling methods of data recorded at monthly interval.

Key skills learned

- Design a Shiny dashboard consisting of interactive graphs and tables to present the results. Emphasize important details of the dashboard to ensure it is user-friendly and appeals to a non-technical audience

09/2020

ICMR in patients under 18 years old report

[Link](#)

Objective : Investigate the relationship between variables in the context of medical statistics.

Key skills learned

- Generate a report to summarise the applications of different statistical techniques to health data and highlight key findings
- Interpret the outcomes to answer to the research question and make comments towards future considerations

09/2020

Multi-class Random Forest classifier technical report

[Link](#)

Objectivet - Understand the analysis of multi-class data using a machine learning algorithm.

Relevant key skills

- Understand the role and concept of machine learning algorithms in relating to data analytics
- Develop a Random Forest classification model for real data in a multi-class setting

LANGUAGES

- Vietnamese (fluent)
- English (fluent)
